**On “Rational Design, Solution Synthesis and Characterization of Photo-luminescent Ink”**

7-12 March 2022

No. of Students; 41

Dr. Sudeshna Ray (Centre Director of Advanced Material Research Centre) gave deliberation on growing importance of phosphor in national security. She explained in detail about phosphors being used in the form of photoluminescent ink on passports and currency notes to counterfeit frauds. For the next two days, students worked in lab to prepare photoluminescent ink in the guidance of faculty members of Chemistry Department. The workshop not only ignited student's interest in phosphors but also encouraged students to take up research projects on nanomaterials and phosphors.
