

Career Counseling and Guidance of Competitive Examinations Initiatives

Career College, Bhopal continuously supports and guides its students to excel in their respective disciplines. All the departments of the college have various mechanisms to guide its students for competitive examinations. To enhance and inculcate career information among students, the faculties are continuously providing valuable inputs. This gives them a platform to make necessary decisions regarding career alternatives together with mainstream employments. Time and again the departments organize various lectures by experts in their respective fields. Books related to preparations are available in the departments and college central library along with e-books necessary for cracking these exams. Dedicated classes are also taken in some departments for the preparation and counseling of the students for competitive examinations like CSIR-NET, ICAR-NET, IELTS, GATE, MAT, MP-PSC, etc.

The training and Placement cell in Career College organizes various career counseling through comprehensive training programs to support students in developing a career in their desired fields. The cell provides students with the resources and qualities necessary to pursue their career goals. Emphasis is laid on building the career related soft skills to take responsibility for career development.

Few of the initiatives are listed below:

Career College, Bhopal
Department of Library & Information Science
Report on Guest Lecture

27th November, 2021

Career College, Bhopal Department of Library & Information Science organized a Guest Lecture on Job Opportunity and future in LIS Field the Resource person was Dr. P.K. Tripathy Head, Resource Learning Centre Regional Institute of Education (RIE), Bhopal. He says *If you are somebody who is organized and like working with people and passionate about the value of knowledge and Information..... Then the job of librarian might be best for you.*
"The Librarian is a person trained in library science and responsible for running of library services in public libraries, colleges, universities and schools."

Dr. Tripathy Enlighten Today a librarian is also entitled as "Information Manager", "Cybarians" and "Information Scientists". In history, Ashurbanipal was the first individual who introduces librarianship as a profession. The Sumerians were the first clerks who are trained to keep records of accounts. The advancement of technology in libraries has a major impact on the roles of the librarian. They keep track of newly advanced features, databases, etc. The competition among students is increasing for various competitive exams. Students search books and study material for study from various sources so, the library is the very first source which strikes in the student's mind. To become librarian, one must have some skills like communication, how to organize things, knowledge of books, etc. You should also have the knowledge of electronic devices used as an information source.

He also focused on the present scenario; Librarians are highly demanded in both government and private sectors. They can also work as a research assistant to professors or in publishing companies in preparing bibliographies and catalogues. You can go for further studies in this field. The number of schools and colleges are going to open in the country; it offers great opportunity to fresh professionals.

Librarians & Library workers helps people find information & use it effectively for personal & professional purposes. It is a tough task to become a librarian, one have to remember & tracks books reference materials, records & other related files where they are hired. The Session was very Interesting and fruitful for students and Library professionals.
